

A High-energy Life

Professor Lynn Cominsky
Department of Physics and
Astronomy
Sonoma State University

My Mom and the Stars

- I first learned about the stars from my Mom
- She taught me the constellations on camping trips with our girl scout troop
- And so I started looking up at the night sky in wonder...

Home, Sweet Home?

- Growing up in Buffalo, we didn't see the sky too often – too much snow!

A young skywatcher...

Sweet Home High School

My childhood

College at Brandeis U. (1971-1975)

- I was a physical chemist, with a double major in physics
- I studied the Belusov-Zhabotinsky oscillating reaction

Prof. Irv Epstein

Non-linear chemical
dynamics

Harvard -Smithsonian Center for Astrophysics (1975-1977)

- Analyzed data from Uhuru – first x-ray satellite

60 Garden Street
Cambridge, MA

Drs. Bill Forman and
Christine Jones

What are X-rays and Gamma rays?

Grad School at MIT (1977-1981)

Zonta Amelia
Earhart Fellow

1977, 1978, 1979

SAS-3
X-ray
Astronomy
satellite

Got married to Dr.
J. Garrett Jernigan,
Jr. on 6/1/1980

UCB Space Sciences Lab (1981 - 1986)

- Worked on Extreme Ultraviolet Explorer satellite project

UCB SSL

EUVE

Prof. C. Stuart
Bowyer

Space Shuttle Challenger 1/28/86

- EUVE launch delayed for many years
- Was offered SSU Associate Professor position
- “Cosmic Sign?”

Sonoma State University (1986 - present)

- Worked on Very Small Array radio telescope on roof of Darwin Hall
- Taught electronics, various physics & astronomy
- Many NASA research grants with undergrads
- Tenure in 1990
- Full professor in 1991

One VSA dish

Astronomy press (1996-)

- High Energy Astrophysics Division -1st press officer (1996-2002)
- American Astronomical Society Deputy Press Officer (1997 – present)

Presiding over a press conference at AAS

Education and Public Outreach at SSU (1999 -)

- >\$6 M in funding to date
- NASA High-energy missions
 - GLAST (to be launched in 2008)
 - Swift (launched 11/20/04)
 - XMM-Newton (12/10/99)
- North Bay Science Project
 - 2000-2005
 - Trained elementary teachers

NASA's Swift Gamma-ray Burst Mission

- Studies Gamma-Ray Bursts with a “swift” response
- Launched 11/20/04

Gamma-ray Large Area Space Telescope (GLAST)

- To be launched
NET December
14, 2007

- Will study black holes, supernovae, gamma-ray bursts, neutron stars and more!

Explaining the High-energy Universe

- Formal education for grades 7-12
- Informal education through museums, planetaria, web-based activities
- Public Outreach through web, television, printed materials, games, etc.

Curriculum guides

- Invisible Universe (GEM)
- Active Galaxies
- Gamma-ray Bursts
- Supernovae
- TOPS
 - Far Out Math
 - Scale the Univers
 - Pi in the Sky

Teacher Training

- Educator Ambassador workshops
 - Over 36,500 teachers trained in 5 years

- Exhibit booth

Cookie cutter Astrophysics

The Black Hole Project

- Planetarium show - Black Holes: The Other Side of Infinity
- PBS NOVA show: Monster of the Milky Way
- Directed by Tom Lucas

Computer activities

- Space Mysteries
- Dying Stars and the Birth of the Elements
- GLAST Large Area Telescope
- Portable Planetarium Show

GLAST Optical Robotic Telescope (GORT)

- Located at California Academy of Sciences' Pepperwood Natural Preserve
- Next door to Hume Observatory
- Partnership between SSU, NASA and Cal

And on a personal note....

Garrett on Blazar and Lynn
on Mr. Ed at Lake
Camanche 5/05

Oreo

Gizzy

Nugget

Tracy

Hannah

Patchy

S

Beau

Smoky

Backups Follow

Black Holes & Neutron Stars in Binary Systems

- Binary systems with one “normal” star, and a dense, compact companion
- Gravity from compact star pulls matters from normal star
- Matter heats up as it falls in, making X-rays

3D Simulation by John
Blondin,

Ph.D. Thesis - X-ray Burst Sources

- Accreted matter piles up on surface of neutron star
- Bursts are due to thermo-nuclear explosions on the surfaces of neutron stars → H-bombs in
